AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and request for comment.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. chapter 35), the FDIC may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. SUPPLEMENTARY INFORMATION:

This notice requests public comment on the FDIC's request for extension of OMB's approval of the Regulatory Capital Rules information collection more fully described below. OMB approved the ICR under emergency procedures for review and clearance in accordance with the PRA. The FDIC is not proposing any changes to the existing ICR at this time. A description of the collection and the current burden estimates follows.

Proposal to extend the following currently approved collection of information:

Title: Regulatory Capital Rules.

OMB Number: 3064-0153.

Affected Public: State nonmember banks, state savings associations, and certain subsidiaries of those entities.

Estimated Number of Respondents: Advanced approaches – 8; Minimum capital ratios – 4,571; Standardized approach – 4,571.

Frequency of response: Occasional.

Estimated Time per Response: Varied.

Total Estimated Annual Burden: 737,275 hours.

General Description of Collection: This collection comprises the disclosure and recordkeeping requirements associated with minimum capital requirements and overall capital adequacy standards for insured state nonmember banks, state savings associations, and certain subsidiaries of those entities. The capital standards are consistent with agreements reached by the Basel Committee on Banking Supervision (BCBS) in "Basel III: A Global Regulatory Framework for More Resilient Banks and Banking Systems,"

and with section 171 of the Dodd-Frank Act, which requires establishment of minimum risk-based and leverage capital requirements, and with section 939A of the Dodd-Frank Act, which requires the use of alternatives to credit ratings for calculating risk-weighted assets. The data is used by the FDIC to evaluate capital before approving various applications by insured depository institutions, to evaluate capital as an essential component in determining safety and soundness, and to determine whether an institution is subject to prompt corrective action provisions.
